DIHYDROTACHYSTEROL PhEUR/USP
(DHT-2 or Dihydrotachysterol-2)

DIHYDROTACHYSTEROL PhEUR/USP

(DHT-2 or Dihydrotachysterol-2)

Dihydrotachysterol-2 (DHT-2) is a vitamin D2 analog for the Pharmaceutical industry. Dihydrotachysterol-2 is used in the prevention and treatment of several bone growth disorders such as osteoporosis. Besides this the substance is also used to treat several abnormalities of the parathyroid glands such as hypoparathyroidism.

Our Dihydrotachysterol-2 is made under cGMP regime. Dishman supplies this API from Veenendaal, the Netherlands.

Specification: Chemical name: Dihydrotachysterol-2, DHT-2
Dihydrotachysterol-2 is a white, or almost white, crystalline substance.
Purity is 97-102%

•• **Structural formula:**

CAS no. 67-96-9

Toxic classification: Very toxic (category T+). Before handling this substance, read the special directions on the label and Safety Data Sheet (available upon request).

Regulatory: We have an up to date DMF and a CoS/CEP. We can also offer a technical package with full regulatory support.

Application: Pharmaceutical industry. Suitable for drug formulation including tablets, injectables, oral solutions and soft gel capsules.

The information given in this product information bulletin is based on our current knowledge and experience. It does not relieve users or processors from carrying out their own precautions and tests. Any relevant rights and existing legislation and regulations must be observed.
