

CHOLESTEROL XG

Cholesterol XG is a slightly off-white powder. It is made from wool grease by extraction and refining processes. Cholesterol XG is insoluble in water. The product consists of cholesterol and contains 10-13% Inducal (CaCo3). Approximately 1% Aerosil is added to improve flowability.

Specification:	Cholesterol (GC), ≥ 80% Total sterol (GC), typical 85% A-tocopherol, ≥ 50ppm (anti-oxidant)
CAS no.	57-88-5
Application:	As an ingredient for shrimp feed Cholesterol is an essential molecule for the synthesis of molting hormones, sex hormones, bile acids, vitamin D and is a building block of shrimp tissues. Cholesterol cannot be metabolized by the shrimp and has therefore to be added to the shrimp feed.
Packing:	Fibre drums containing 50 kg net in plastic foil.
Storage:	To avoid contamination keep the drums well closed.
Stability:	Retest after 3 years, if stored at ambient temperatures in original undamaged packing.

The information given in this product information bulletin is based on our current knowledge and experience. It does not relieve users or processors from carrying out their own precautions and tests. Any relevant rights and existing legislation and regulations must be observed.
